

Pipe Hangers

Pipe hangers are used to support a sprinkler piping system from the building structure. Two or more listed components may be required to form a complete hanger assembly. The specific components required depend upon the type of building construction and the pipe size.

C-Type Clamps

A type of clamp that is used to provide a load carrying connection to the flange of a building structural element, usually by use of a jaw and setscrew combination. It also provides for the attachment of a threaded rod.

Models B20 and B24

Product Specification

Model No	Description	Hanger Rod Size, in (mm)	Nominal Pipe Size		Remarks
			in	(mm)	
B20	Universal Beam Clamp	3/8 (10)	3/4 through 4	(20 through 100)	a
