

Intermountain Medical Center

Intermountain Medical Center is the largest healthcare facility in the Intermountain West area and was voted Project of the Year in Utah for 2007. This facility includes 193,000 square feet Heart Center, and 586,000 square feet, 14-story Patient Tower with 486 rooms. This facility also houses the second largest hyperbaric chamber in the US.

Shurjoint grooved products (up to 14") were used on this project's chilled/condensed/domestic/heating water supply system.
