

Costco Taipei

COSTCO is a membership warehouse club, dedicated to bringing their members the best possible prices on quality brand-name merchandise. They have three shopping malls in Taipei. One of them is located in Neihu.

COSTCO Taipei has an American engineered fire-protection system which utilized Shurjoint #7705 couplings, #7721 mechanical tees, and many grooved-end fittings. All products were approved by the consultant as the grooved joining method does not require welding, and fewer workers are required for a shorter duration.
