

Aqaba Airport

Aqaba Airport (also known as King Hussein Int'l Airport) is located in the vicinity of Industrial City, a northern suburb of Aqaba in Jordan. The location of Aqaba is encircled by three other countries, Egypt, Saudi Arabia and Israel. The airport has a single runway equipped with category 1 instrument landing system (ILS).

Shurjoint grooved couplings and fittings were specified for the fire protection system in the parking lot because of their flameless installation requirement. It reduced the cost as the mechanical pipe joining method is safer, and it is easier to work with during the system installation and maintenance activities.
