

Evergreen Aviation Maintenance Hangar

Evergreen Aviation Hangar 2 is located at Taoyuan, and is to supervise functions assigned in the service, repair and overhaul of aircraft and aircraft components, parts, and accessories.

Shurjoint Ductile Iron Couplings and Fittings and Threaded were utilized for the fire protection system. The engineers are satisfied with the products reliability as all Ductile Iron Threaded Fittings are 100% air tested underwater before delivery and all of them are UL listed & FM approved for 300 psi (CWP). And Shurjoint grooved installation process is relatively simple and requires only a spanner or wrench at a job site which increased the installation and elimination of the flame precautions or risks over traditional methods.
