

Merck Chemical Factory

The Merck Chemical Guanyin Factory is located in Guanyin, Taoyuan, Taiwan, and is one of the world's major producers and distributors of liquid crystals and auxiliaries for the production of flat panel displays.

Shurjoint grooved couplings and fittings were specified and used on the Fire Protection system because of their superior ability to accommodate pipe movement caused by seismic events. Shurjoint was also specified because the grooved system does not require a "fire watch", unlike a welded system.
